### **REPORT ON RAMANUJAN DAY CELEBRATIONS – 2025**

**Date : 23.12.2025**

**Host Class : Std. V and VI**

Ramanujan Day was celebrated with great enthusiasm on December 23, 2025 to commemorate the birth anniversary of the legendary Mathematician Srinivasa Ramanujan. The celebration aimed to instill a love for Mathematics, highlight its relevance in daily life, and showcase students' creativity through performing arts and intellectual activities.

Students presented a graceful '**Angles Dance**', creatively depicting acute, obtuse, right, straight, and reflex angles through coordinated body movements. The performance beautifully combined Mathematics with rhythm and expressions, making abstract concepts visually appealing and easy to understand.

A thought-provoking skit titled '**Maths is Everywhere**' was performed by students. Through everyday situations such as shopping, travel, cooking, architecture, and sports, the skit effectively conveyed how mathematics plays a vital role in our daily lives. The skit carried a strong message that maths is not limited to textbooks but is an essential life skill.

**Symbols Formation Dance**, in this innovative performance, students formed various mathematical symbols such as plus (+), minus (-), multiplication ( $\times$ ), division ( $\div$ ), equal to (=), and infinity ( $\infty$ ) using synchronized movements. The dance reflected teamwork, precision, and creativity while reinforcing symbol recognition in an engaging manner.

An interactive **Mathematics Quiz** was conducted to test students' logical reasoning, problem-solving skills, and mathematical knowledge. The quiz generated excitement and healthy competition among participants and encouraged quick thinking and active participation.

The programme helped students gain a deeper appreciation for Mathematics with its real-life applications and improve conceptual understanding through experiential learning.

The Ramanujan Day celebration was a grand success, blending learning with joy and creativity. The various activities helped students realize that Mathematics is not just about numbers but also about patterns, movements, logic, and life itself. The programme truly reflected the spirit of Srinivasa Ramanujan and inspired students to explore Mathematics with curiosity and confidence.
