

REPORT ON WORLD SCIENCE DAY CELEBRATION - 2025

Host Class : Std. IV
Date : 10.11.2025 (Monday)

Our School observed World Science Day on 10 November, 2025 for Peace and Development. The event hosted by Std. IV, aimed to highlight the importance of Science in shaping a peaceful and progressive world. The program began with the rendition of Gayatri Mantra and DAV Gaan, followed by an Introductory Speech by Rithanya of Std IV who emphasised how Science connects people globally, inspires young minds to think creatively and work towards a better tomorrow.

The celebration featured engaging presentations by students of Std. I to IV. The youngest learners of Std. I took the stage first with a speech on great 'Scientific Discoveries', using colorful placards to depict inventions that have transformed human life. The next on the agenda was an interview segment by the students of Std. IV, who brought to life famous scientists. Dressed as great innovators like Newton, Edison, and Dr. A P J Abdul Kalam, the Scientists fulfilled the curiosity of students about their inventions and discoveries while holding informative placards. Their act truly paid tribute to the pioneers of Science.

The lively performers of Std. II, presented a skit showcasing the role of Science in everyday life. Through humorous and relatable scenes, they demonstrated how electricity, household gadgets, and technology make our routines simpler, safer, and more enjoyable. The curious minds of Std. III turned into real-life scientists with their segment titled "Little Scientists at Work". Simple and fascinating experiments demonstrated phenomena like volcanic eruptions using harmless chemicals and showing how a lemon floats in water, sparking awe and curiosity among the students.

Pranitha proposed the Vote of Thanks, expressing gratitude to the Principal, Supervisory Heads, Teachers, and participants for making the day a memorable one. The Supervisory Head shared her inspiring words, motivating students to awaken the spirit of enquiry, engage in experimentation, and explore new ideas fearlessly.

The celebration concluded with the National Anthem followed by the Shanti Paat, filling the atmosphere with pride and peace. The celebration beautifully reflected that Science is not confined to laboratories or textbooks - it is a way of exploring, questioning and creating a better, brighter, and more peaceful world.
