A REPORT ON THE WORLD WATER DAY Classroom Activity

DATE: 18.06.2025 (Wednesday)

EVENT HOST: CLASS II

To commemorate the World Water Day, Grade II students participated in a creative classroom drawing activity designed to raise awareness among students about the importance of water conservation. This engaging initiative encouraged students to express their thoughts and ideas creatively through art, fostering a deeper understanding of this vital resource.

Students were encouraged to express their understanding of earth care and water conservation through a creative drawing activity, bringing their thoughts to life with meaningful visuals. This initiative aimed to instil the value of water and empower students to recognise the impact of small actions in making a significant difference.

Students showcased their creativity and awareness through vibrant drawings depicting eco-friendly practices like rainwater harvesting, turning off taps, reusing water, and protecting rivers and lakes. With great enthusiasm, they were deeply engaged in the activity, bringing their ideas to life through art.

‘The students’ ability to articulate the ideas behind their drawings showcased their clear understanding of the theme. The visual medium proved to be an effective tool, making the learning experience both memorable and impactful.

The World Water Day activity was a resounding success, nurturing students’ artistic talents while instilling the importance of water conservation in young minds. Such initiatives are crucial in shaping environmentally responsible citizens. The event sparked meaningful conversations about responsible water usage extending its impact beyond the classroom to homes and communities.
