REPORT ON EYE SCREENING CAMP

A Free Eye Screening Camp was organized at D.A.V Public School by Jarma Wellness, Mumbai in collaboration with Sun Pharma, Bengaluru from 18.8.25 to 21.8.25. The four day camp covered all classes systematically.

The Camp was organized to create awareness about Myopia (short sightedness) and other common eye problems among students, to identify vision related issues in the early stage and to provide timely guidance for students requiring medical intervention.

Trained health professional carried out eye screening for each student with latest technological device – Plusoptix Vision Screener. Written notes were issued to all students mentioning whether eyesight was normal (pass) or if a doctor consultation was recommended (referral). Awareness was created among students regarding healthy eye habits such as proper reading distance (12-18 inches), reducing screen time, 20-20-20 Rules.

The final detailed report for each student will be handed over to the school within 15 days for further follow-up.

The Eye Screening Camp helped in early detection of vision problems, raised awareness about the rising incidence of myopia among School children and also emphasized on preventive strategies.
