REPORT ON WORLD OZONE DAY

Date : 16.09.2026

Time : 09:00 a.m. – 9:30 a.m.

Host : Class IX

Theme: “Global Action for a Cooler Planet”

World Ozone Day was observed by the students of Class IX on 16 September, 2026 to create awareness about the importance of the ozone layer and the need for its protection. The programme highlighted the role of collective action in safeguarding the environment and ensuring a sustainable future.

The programme commenced with an introduction by Harshith R of Class IX C, who spoke about the significance of the ozone layer as a protective shield against the Sun’s harmful ultraviolet radiation.

The students presented two informative and engaging programmes. The first was a creative skit titled “Ozone Court - The People vs. Unsustainable Cooling”. Through an imaginative courtroom setting, the students highlighted the importance of cooling systems while drawing attention to their environmental impact. The skit also sensitised the audience to the Montreal Protocol and the Kigali Amendment, and their role in protecting the ozone layer and promoting environmentally responsible cooling practices.

The second programme, “Ozone Timeline: From Crisis to Recovery,” presented significant milestones in the history of ozone-layer protection, tracing developments from the early understanding of ozone depletion to present-day efforts and future goals. The timeline helped the audience understand how global cooperation has contributed to addressing the ozone crisis.

The celebration concluded with a strong message: “Cool Smarter, Protect the Ozone, Protect our Future”. The programmes presented by the students of Class IX successfully conveyed the importance of responsible choices, global cooperation, and environmental stewardship in protecting our planet.
